

ENERGY POLICY MIGUEL TORRES S.A.

MIGUEL TORRES S.A. aspires to operational excellence and continuous improvement in reducing energy costs, in line with the company's global strategy.

The measured and efficient use of energy and raw materials is a key goal for our company, taking into account that the cost of the energy market is high and also recognizing that the resources of our world are limited. For this reason, it is necessary to dedicate effort to generate and use energy in an efficient way and duly registered.

We believe in energy efficiency as the best way to achieve the reduction of energy consumed, to increase our company's competitiveness and to sustainably protect the environment.

In this sense, we manifest our total respect and compliance of the all legal requirements associated.

Thus, Miguel Torres S.A. commits to:

1. Establishing and fulfilling the annual goals in regards to improving energy use.
2. Implementing the necessary internal mechanisms to continuously improve energy performance, and by supporting the acquisition of energetically efficient products and services.
3. Establishing strategies to reduce energy use in all of our company's activities, by supporting designs to improve energy performance in line with our general strategy.
4. Providing the necessary resources to carry out actions that reduce energy consumption (when these are visible).
5. Analyzing progress and share achievements at all levels of the organization.
6. Applying all legal requirements, along with other such requirements related to the efficiency, use and consumption of energy.
